Welcome to the College of Business and Technology

If you are a high school student considering a business career or a transfer student planning on completing a bachelor's degree we have a selection of programs for you.

If you would like a residential campus experience or currently work full time and want to complete your degree at a time and place convenient for you, we offer you that choice.

Want a graduate degree? We have four Masters programs designed to meet the needs of working professionals planning to advance in their careers.

All of our programs are designed to meet the needs of employers in northeastern Oklahoma and beyond. We teach you relevant business and technology skills while helping you to develop important analytical and communication skills which help you to succeed in your career. We know we can do this for you because we have been offering students in northeastern Oklahoma this service since 1867.

All business programs are accredited by Association of Collegiate Business Schools and Programs, one of the premier global business accrediting bodies.

Please join us. We look forward to helping YOU achieve YOUR goals.

Roger Collier, Dean & Professor
